To Whom It May Concern

Paekākāriki Hill Road – Eco Reef – Emergency Works

I am writing to provide a reference for SBA Civil in relation to their recent work on the retaining wall project on Paekākāriki Hill Road, which was carried out under emergency conditions. Our experience with SBA Civil has been nothing short of exceptional, and I am pleased to highlight their innovative solutions and outstanding performance. This project involved the trial with ECO Reef modules, and it didn't disappoint, an innovative product that highlighted importance of how this product can work in emergency situations with quick implementation to prevent further damage to roads and infrastructure.

When faced with the urgent need for a retaining wall due to unstable conditions on Paekākāriki Hill Road, SBA Civil demonstrated remarkable efficiency and professionalism. They completed the project in just 13 days, showcasing their ability to mobilise quickly and deliver results under pressure. This swift action not only addressed the immediate safety concerns but also demonstrated their commitment to community welfare.

Throughout the project, SBA Civil maintained a high level of transparency and proactivity. Their team kept us informed at every stage, ensuring that all stakeholders were aware of progress and any challenges encountered. This open communication fostered a collaborative atmosphere and built trust between our organizations.

Notably, the project came in well under the estimated budget, which is an outstanding achievement for the council. Despite completing three variations within the contract value, SBA Civil managed to deliver the project while still coming in under the estimated cost to completion. This level of financial prudence is truly commendable and is often unheard of in our dealings.

The team at SBA Civil proved to be resilient and adaptable, effectively navigating the various weather conditions and multiple rain events that could have hindered progress. Their thorough planning and execution ensured that the project remained on schedule, and the quality of the retaining wall exceeded our expectations. It stands as a testament to their expertise and dedication to delivering high-quality infrastructure solutions.

In conclusion, I wholeheartedly recommend SBA Civil for any future projects. Their innovative approach, skilled team, and commitment to excellence make them a valuable partner in any civil engineering endeavour. We look forward to the opportunity to work with them again in the future.

Sincerely,

Ngā mihi
