TO WHOM IT MAY CONCERN

TRANSMISSION GULLY: REFERENCE – SBA CIVIL LIMITED

SBA Civil Limited (**SBA**) has been involved with the Transmission Gully project since March 2020. We have found SBA to be a trusted contractor who has delivered all aspects of the Transmission Gully project to a very high standard, including project management of packages and a high focus and performance in health and safety through risk review and prevention, and PPE presentation and compliance.

Work disciplines completed on Transmission Gully included:

- Earthworks;
- High risk slip repairs;
- Stormwater installation;
- Water (bulk and residential) installation;
- ITS conduit and pit installation;
- Subgrade installation;
- Working on live motorways and local roads;
- Stream diversions and water control;
- Environmental controls installation and compliance; and
- Project management of packages (including all upfront programming, work pack compiling, permit process sign-off, local authority and utility provider coordination and weekly report updates).

SBA has delivered all contract works on time as per agreed programmes produced for each contract. Additionally, the company has a very open book policy when it comes to scope changes or variations where it has notified well in advance and shown integrity in all contract discussions. SBA has a strong and trusted team, all members of whom have complied with the project guidelines and requirements at all times.

I would recommend SBA as a dedicated and trusted contracting company who has a high performing record. Please feel free to contact the undersigned with any further enquiries.

Kindest regards

Kevan Rocher
Project Director – Transmission Gully
