To whom it may concern,

SBA Civil Ltd have recently been engaged by Worley NZ on a brownfield construction project at MSD Animal Health in Upper Hutt, New Zealand

The scope of the work assigned to SBA encompassed various civil construction and reinstatement activities all completed within a very compact construction site and alongside a fully operational site. This scope of work included the following items:

- Installation of ductile fire water ring main piping
- Installation of new stormwater and sewer / trade waste piping and manholes
- Modification of existing stormwater and trade waste piping during limited shutdown periods
- Installation of electrical and service ducting and pull pits

They completed all works to a very high standard and in accordance with the design specifications, industry standards and overall site requirements. They managed their subcontractor network well while maintaining good communication with the Worley Construction Management Team at all times.

It must also be noted that SBA Civil Ltd went out of their way to incorporate a large amount of emergent work and to accommodate last minutes changes due to the high level of project management skills shown. All works were completed on time, within budget and with no incidents.

Their friendly, personable, and jovial approach to work was also well received by the client and they integrated seamlessly into our community based HSE culture on site.

It is without hesitation that I would recommend SBA Civil Ltd for any prospective civil work they pursue and are confident in their ability to deliver a quality product when we engage their services for any future work with Worley NZ.

Yours Sincerely

Heath Radcliffe
Construction Manager
